Summary

Flutter Developer with 1+ years of professional experience developing and maintaining enterprise-grade mobile applications using Flutter and Dart. Experienced in REST APIs, JSON, Firebase, state management, Clean Architecture, and third-party SDK integration. Hands-on with **AI-assisted development and prompt engineering**, using tools such as **Codex, Cursor, Kiro, Warp, and Antigravity** to accelerate development, debug issues, explore solutions, and improve development workflows. Experienced in AI-powered application features using Google ML Kit, with a strong problem-solving and continuous-learning mindset.

Skills

Languages: Dart

Frameworks: Flutter

State Management: Bloc, Cubit, GetX

Backend & APIs: REST APIs, JSON Parsing, Firebase, Supabase, Third-party SDK Integration

Architecture: Clean Architecture, MVVM, SOLID Principles

Mobile Features: Push Notifications, Deep Linking, Geolocation

AI-Assisted Development: Codex, Cursor, Kiro, Warp, Antigravity, Prompt Engineering, AI-assisted Coding, AI-assisted Debugging, Code Generation & Refactoring, Development Workflow Automation

Advanced Mobile Features: NFC Scanning, BLE Beacons, Face Recognition, Google ML Kit,

Development Tools: Android Studio, VS Code, Git, GitHub, Branching, Pull Requests, CI/CD, Postman, Flutter DevTools

Testing & Debugging: Flutter Test, Unit Testing, Basic Integration Testing, Flutter DevTools, Performance Optimization

Soft Skills: Problem Solving, Collaboration, Agile Development

Work Experience

CODELOUNGE - Software House

Lahore - Punjab

Flutter Developer

July 2025 – Present

- Contributed to the development and maintenance of **2+ enterprise Flutter applications** for workforce tracking, inspections, and site management.
- Developed and integrated RESTful APIs for inspection, task management, workforce tracking, and authentication modules in enterprise Flutter applications.
- Reduced manual verification by implementing NFC and Face Recognition.
- Improved code maintainability using Clean Architecture.
- Collaborated closely with backend developers, UI/UX designers, QA engineers, and project managers during Agile sprints, participating in code reviews and Git-based development workflows.

Projects

CeertifAi

- Engineered an enterprise Flutter application for workforce tracking and site management.
- Integrated REST APIs for inspections, task management, workforce operations, and real-time project data.
- Implemented NFC, BLE Beacons, and Face Recognition for secure employee verification.
- Applied Clean Architecture with GetX to build scalable and maintainable modules.
- Integrated **AI-powered material classification using Google ML Kit**.
- Used **AI-assisted development workflows** for code generation, debugging, refactoring, problem solving, and development productivity.

Quick Quran Learning Urdu - [Android](#)

- Built a Quran learning app with Urdu Tafseer and Tajweed support.
- Implemented deep linking and external content integration.
- Built scalable and high-performance UI using Flutter.

Education

University of Sargodha

Bachelor of Science in Information Technology (BSIT)

Bhakkar, Pakistan

2020 – 2024
