## Summary

Flutter Developer with 1+ years of professional experience building enterprise-grade cross-platform mobile applications using Flutter and Dart. Experienced in designing scalable architectures, integrating RESTful APIs and third-party libraries, implementing responsive UI, and collaborating with cross-functional teams in Agile environments. Proficient in GetX, Bloc, Clean Architecture, Firebase, Supabase, Git, and modern Flutter development best practices. Passionate about building high-performance, maintainable mobile applications.

## Skills

**Languages:** Dart

**Frameworks:** Flutter

**State Management:** Bloc, Cubit, GetX

**Backend & APIs:** RESTful APIs, Firebase, Supabase, Third-party SDK & Library Integration

**Architecture:** Clean Architecture, MVVM, SOLID Principles

**Mobile Features:** Push Notifications, Deep Linking, Geolocation

**Advanced Mobile Features:** NFC Scanning, BLE Beacons, Face Recognition, Google ML Kit,

**Development Tools:** Android Studio, VS Code, Git, GitHub, Branching, Pull Requests, CI/CD, Postman, Flutter DevTools

**Testing:** Flutter Test, Unit Testing, Integration Testing (Basic), Debugging, Performance Optimization

**Soft Skills:** Problem Solving, Collaboration, Agile Development

## Work Experience

### CODELOUNGE - Software House

Lahore - Punjab

Flutter Developer

July 2025 – Present

- Contributed to the development and maintenance of **2+ enterprise Flutter applications** for workforce tracking, inspections, and site management.
- Developed and integrated RESTful APIs for inspection, task management, workforce tracking, and authentication modules in enterprise Flutter applications.
- Reduced manual verification by implementing NFC and Face Recognition.
- Improved code maintainability using Clean Architecture.
- Collaborated closely with backend developers, UI/UX designers, QA engineers, and project managers during Agile sprints, participating in code reviews and Git-based development workflows.

## Projects

### CeertifAi

- Engineered an enterprise Flutter application for workforce tracking and site management.
- Integrated REST APIs for inspections, task management, and real-time project data.
- Implemented NFC, BLE Beacons, and Face Recognition for secure employee verification.
- Applied Clean Architecture with GetX to build scalable and maintainable modules.
- Integrated AI-powered material classification using Google ML Kit.

### Quick Quran Learning Urdu - [Android](#)

- Built a Quran learning app with Urdu Tafseer and Tajweed support.
- Implemented deep linking and external content integration.
- Built scalable and high-performance UI using Flutter.

## Education

### University of Sargodha

Bhakkar, Pakistan

Bachelor of Science in Information Technology (BSIT)

2020 – 2024
